Nabil Ettihadi

Full-Stack Java / Angular Developer · Techno-functional E-invoicing Consultant

PROFILE

Full-stack developer and techno-functional consultant with a year and a half of professional experience on data-processing pipelines for large enterprise clients (electronic invoicing, French CTC reform). I build REST APIs in Java/Spring Boot, Angular and React interfaces and Laravel applications, tested and shipped with Docker. Used to working directly with project managers and clients. Available right away as a freelancer, with one month's notice for a permanent role, on site, hybrid or remote.

PROFESSIONAL EXPERIENCE

Techno-functional Consultant · Cegedim, Rabat — 04/2025 – present

- Bring electronic invoicing flows into compliance with the French CTC reform for large enterprise clients.
- Develop and maintain XSLT transformations on the GIS (Global Invoice Suite) platform: UBL 1.6 and 2.1, Factur-X, CII.
- Configure and monitor inbound and outbound EDI chains; KornShell scripts on AIX (encoding, file splitting, integrity checks).
- Investigate and fix production incidents, run functional acceptance tests, work directly with project managers and clients.

Full-Stack Developer · internship · GEERD, Casablanca — 05/2024 – 07/2024
